

Should drivers in the United States be legally required to switch from traditional vehicles to electric vehicles in the next 20 years?

Thesis Statement- It would be unreasonable for drivers to make the switch to electric vehicles from traditional vehicles because one, they are way too dangerous, two they are also way too expensive And three they have raw materials that are bad for the environment.

Outline Statement:

Opposing Argument 1: Price Cost

- They are about 30,000 dollars more than Traditional vehicles
- Batteries replacement cost around \$5,000 to \$20,000
- The raw materials that are used cost a lot of money them self

Opposing Argument 2: Bad for the environment

- How they have raw materials that are used
- Manufacturing pieces are the result in higher carbon emissions

Opposing Argument 3: Alarming/Hazardous

- They can blow up
- Burning issues
- Charging Problems
- Performance Problems
- Weather problems
